PROPOSAL & QUOTATION
Date: October 23, 2026
Document Ref: HAIL-PROP-2026-SKS01
Valid Through: 30 Days

Project Proposal & Commercial Quotation

Autonomous Tri-Agent AI Synthesis & Publication Framework for *SK Sutras: Udyoga Sutras*

Client / Primary Author:	**Shri Shripad Kulkarni**	**Technology Partner:**	Hiranyam AI Labs (notifications@hiranyamai.com)
Project Title:	SK Sutras (Udyoga Sutras Treatise)	**Target Deliverable:**	Print-Ready Publication PDF & Proofreading Drafts

1. Executive Summary

Hiranyam AI Labs is privileged to submit this formal proposal and quotation to **Shri Shripad Kulkarni** for the complete research, synthesis, multi-agent AI engineering, and pre-press publication workflow of the monumental philosophical treatise: ***SK Sutras: Udyoga Sutras***.

The objective of this project is to orchestrate a pioneering doctrinal synthesis between two foundational canons of Indian spiritual philosophy—the **84 Narada Bhakti Sutras** (representing ecstatic, experiential devotion) and the **100 Shandilya Bhakti Sutras** (representing rational, epistemological Vedantic inquiry). Through an autonomous Tri-Agent AI architecture, these traditions are systematically cross-examined, filtered against false overlaps, and unified into an authoritative new treatise featuring **original Sanskrit shlokas** and in-depth classical **Marathi Udyoga Bhashya** tailored for modern workplace ethics and human duty.

2. The Autonomous Three-Agent Architecture

Traditional single-model prompts fail when addressing complex scriptural literature because a single model inevitably agrees with itself, producing superficial syncretism. Our proprietary solution deploys three distinct, specialized autonomous agents with contrasting cognitive perspectives that debate, cross-examine, and arbitrate each verse:

Agent Name	Specialized Domain Canon	Cognitive Role & Capabilities
1. Narada Bhakti Sutra Specialist Agent	**84 Narada Sutras** (Experiential Devotion)	Adopts the perspective of Devarshi Narada. Focuses on *Parama-Prema* (unconditional divine love), ecstatic surrender, and practical heart-centered devotion. Formulates formal philosophical propositions to challenge the rational school.

2. Shandilya Bhakti Sutra Specialist Agent	**100 Shandilya Sutras** (Epistemological Vedanta)	Adopts the perspective of Maharshi Shandilya. Maintains all 100 sutras in ChromaDB vector storage. Conducts mathematical semantic searches and defends the rational Vedantic inquiry (*Bhakti-Jijnasa, Tarka*) with rigorous scriptural citations.
3. Sutrakar Agent (Master Coordinator, Arbiter & Creative Synthesizer)	**Vedic Synthesis & New Udyoga Sutras**	Acts as the supreme philosophical arbiter and compiler: • **Strict Non-Compulsory Logic:** Rejects forced or superficial mappings (67 non-matches omitted). • **Anti-Duplicate Intelligence:** Scans memory to eliminate repeated themes or recycled sutras. • **Original Shloka Formulation:** When authentic correspondence is verified, the Sutrakar Agent **composes brand-new Sanskrit shlokas** (new *Udyoga Sutras*). • **Bespoke Marathi Commentary:** Authors multi-paragraph *Udyoga Bhashya* (Doctrinal Harmony, Applied Enterprise & Ethics, and Culminating Realization).

3. Detailed Deployment Options & LLM Selection Rationale

To provide full strategic and financial flexibility, we present two distinct deployment architectures based on commercial frontier Large Language Models (LLMs):

OPTION 1: Hybrid Architecture (ChatGPT + Google Gemini)

Agent-to-Model Configuration:
• **Narada Agent:** OpenAI ChatGPT (GPT-4o)
• **Shandilya Agent:** OpenAI ChatGPT (GPT-4o)
• **Sutrakar Agent:** Google DeepMind Gemini (Gemini 1.5 Pro)

Architectural Rationale:
In Option 1, OpenAI's GPT-4o provides rapid conversational parsing and structured dialectic discourse for the individual source books. The **Sutrakar Agent is powered by Google Gemini 1.5 Pro** because of Gemini's unmatched training corpus on ancient Indian Vedic literatures, native classical Sanskrit grammar, Sanskrit-to-Marathi translation nuance, and massive context window (up to 2,000,000 tokens) which enables the Sutrakar to hold the entire treatise in active memory to prevent duplicate verses and repeated explanations.

Commercial Breakdown:
• AI Compute & Cloud Token Infrastructure: ■**18,000 INR** (approx. $215 USD)
• Hiranyam AI Development, Publication & Proofreading Service Fee: ■**30,000 INR**
• **Total Investment (Option 1):** ■**48,000 INR** (approx. $570 USD)

OPTION 2: Pure Google DeepMind Gemini Specialized Architecture (Recommended)

Agent-to-Model Configuration:
• **Narada Agent:** Google Gemini (Gemini 1.5 Pro Specialized)
• **Shandilya Agent:** Google Gemini (Gemini 1.5 Pro Specialized)
• **Sutrakar Agent:** Google Gemini (Gemini 1.5 Pro / Advanced High-Reasoning)

Architectural Rationale & Superiority:
Option 2 provides specialized in-depth Vedic and Sanskrit mastery across **all three agents**:
1. **Deepest Vedic & Indic Corpus:** Google possesses the world's most comprehensive scanned repository of ancient Indian scriptures, Vedantic commentaries, and Marathi literature via Google Books digitization.
2. **Original Sanskrit Shloka Formulation:** With all agents on Gemini, the Sutrakar Agent can formulate **completely original, grammatically precise, metered Sanskrit shlokas** (new *Udyoga Sutras*) that synthesize the spiritual essence of Narada and Shandilya into a brand-new canonical work.
3. **Nuanced Marathi Translation:** Generates scholarly, classical Marathi prose (*■■■■■■■*) free from crude English transliterations.
4. **Unified Context Caching:** Eliminates multi-vendor API latency and guarantees seamless, zero-duplicate harmonization across all 50 full cycles of canon re-generation.

Commercial Breakdown:
• AI Compute, Deep Contextual Caching, High-Reasoning & Infrastructure: ■**45,000 INR** (approx. $535 USD)
• Hiranyam AI Development, Publication & Proofreading Service Fee: ■**30,000 INR**
• **Total Investment (Option 2): ■75,000 INR** (approx. $895 USD)

4. Scope of Services Covered under Hiranyam AI Fee (■30,000 INR)

Our fixed development and publication service charge of ■**30,000 INR** provides exhaustive end-to-end engineering, editorial, and pre-press support until final sign-off:

- **Multi-Agent Engineering & LangGraph DAG:** Custom construction of the inter-agent state machine coordinating Narada, Shandilya, and Sutrakar agents.
- **ChromaDB Vector Retrieval Setup:** Embedding and indexing all 100 Shandilya sutras and 84 Narada sutras for mathematical semantic matching.
- **Senior Citizen (65+ Mode) Web Review Portal:** Interactive digital workspace designed specifically for Shri Shripad Kulkarni with large touch targets, high-contrast typography, and 1-click approval.
- **Proofreading Book PDF Delivery:** Generating beautifully typeset A4/book-format PDF drafts with Devanagari Sanskrit verses and Marathi commentary for author proofreading.
- **50 Cycles of Re-running & Editorial Corrections:** Unlimited re-synthesis, re-evaluations, author-directed revisions, and tone adjustments till the copy is finalized.
- **Pre-Press Printing Preparation:** Formatting print-ready master files with proper margins, page numbers, cover branding, and publishing headers ready for immediate physical printing.

5. Milestone Schedule & Delivery Roadmap

Milestone	Deliverable Description	Target Timeline	Payment Due
Milestone 1: Project Kickoff & Agent Setup	Ingestion of 84 Narada and 100 Shandilya sutras into ChromaDB. Deployment of Tri-Agent state machine.	Week 1	**40%** of Service Fee + LLM Infra Deposit
Milestone 2: First Complete Proofreading PDF	Batch execution of canon cross-examination. Generation of the first complete *Udyoga Sutra* book draft PDF for author review.	Week 2	**30%** of Service Fee
Milestone 3: Portal Review & Editorial Rework	Author reviews verses in Senior Citizen portal. Multi-agent revisions and re-runs executed per author guidance.	Weeks 3 – 4	—
Milestone 4: Final Sign-off & Print-Ready Master	Final approval by Shri Shripad Kulkarni. Delivery of publication-grade print-ready PDF and archival master files.	Week 5	**30%** Final Balance

6. Commercial Quotation Summary

Cost Element	Option 1: Hybrid Architecture (ChatGPT + Gemini Sutrakar)	Option 2: Gemini Specialized (All Agents on Google Gemini)
Autonomous Agentic AI Infrastructure & Compute (50 full canon passes, multi-million token volume, vector hosting)	■18,000 INR ($215 USD approx.)	■45,000 INR ($535 USD approx.)
Hiranyam AI Engineering & Publication Service Fee (LangGraph DAG, Senior Citizen portal, proofreading PDFs, corrections)	■30,000 INR ($357 USD approx.)	■30,000 INR ($357 USD approx.)
Sanskrit Shloka Formulation & Bespoke Bhashya	Included (Standard Synthesis)	**Included (Original Sanskrit Shlokas)**
Proofreading PDF Deliveries & 50 Rework Cycles	Included till Final Sign-off	Included till Final Sign-off
TOTAL PROPOSED INVESTMENT	**■48,000 INR ($572 USD)**	**■75,000 INR ($892 USD)**

7. Proposal Acceptance & Project Authorization

By signing below, the client confirms the selection of either Option 1 or Option 2 and authorizes Hiranyam AI Labs to commence work according to the milestone schedule outlined herein.

Accepted Option (Please Circle):	**[ ] Option 1 (■48,000) [ ] Option 2 (■75,000)**
For the Client / Author: _____ **Shri Shripad Kulkarni** Date: _____	**For Hiranyam AI Labs:** _____ **Authorized Signatory** Hiranyam AI Labs (https://hiranyamai.com/)
