PROPOSAL & QUOTATION
Date: October 23, 2026
Document Ref: HAIL-PROP-2026-SKS01
Valid Through: 30 Days

Project Proposal & Commercial Quotation

Autonomous Multi-Agent AI Synthesis & Digital Draft Framework for *SK Sutras: Udyoga Sutras*

Client / Primary Author:	**Shri Shripad Kulkarni**	**Technology Partner:**	Hiranyam AI Labs (notifications@hiranyamai.com)
Project Title:	SK Sutras (Udyoga Sutras Treatise)	**Target Deliverable:**	Pre-Proofreading Digital Book PDFs & Revisions

1. Executive Summary

Hiranyam AI Labs is privileged to present this formal proposal and quotation to **Shri Shripad Kulkarni** for the complete research, synthesis, and multi-agent AI engineering workflow of the monumental philosophical treatise: ***SK Sutras: Udyoga Sutras***.

The objective of this project is to orchestrate a pioneering doctrinal synthesis between two foundational canons of Indian spiritual philosophy—the **84 Narada Bhakti Sutras** (representing experiential devotion) and the **100 Shandilya Bhakti Sutras** (representing rational, epistemological Vedantic inquiry). Through a dedicated team of three specialized AI agents, these traditions are systematically cross-examined, filtered against false overlaps, and unified into an authoritative new treatise featuring **original Sanskrit shlokas** and in-depth classical **Marathi Udyoga Bhashya** commentary dedicated to modern workplace ethics and human duty.

2. How the Three Dedicated Book Specialists AI Agents Work Together

Instead of relying on a single AI that tries to do everything at once, our system divides the work between three specialized digital scholars. Each book has its own dedicated specialist agent, and a third coordinator oversees the entire conversation to ensure deep authenticity and zero duplicate matches:

Specialist Role	Assigned Book / Domain	What This Specialist Does in Plain Words
1. Narada Bhakti Sutra Specialist Agent	**84 Narada Sutras** (Devotional Love & Surrender)	Acts as the champion of pure devotion (Parama-Prema). It studies each of the 84 Narada verses, explains its emotional and spiritual meaning, and poses thoughtful philosophical questions to the Shandilya specialist.

2. Shandilya Bhakti Sutra Specialist Agent	**100 Shandilya Sutras** (Logic & Vedantic Inquiry)	Acts as the master of scriptural logic (Bhakti-Jijnasa). It searches the complete 100 Shandilya sutras in our specialized database, finds the closest conceptual matches, and explains the rational philosophy behind them.
3. Sutrakar Agent (Master Coordinator, Arbiter & Synthesizer)	**Vedic Synthesis & New Udyoga Sutras**	Acts as the master editor and judge between the two specialists: • **Prevents Forced Matches:** Rejects weak parallels where verses do not truly match (67 non-matches omitted). • **Prevents Repetitions:** Ensures no verse or explanation is repeated twice anywhere in the book. • **Composes Original Sanskrit Shlokas:** When an authentic match is found, it **composes a brand-new Sanskrit shloka (new Udyoga Sutra)**. • **Authors Comprehensive Marathi Commentary:** Writes in-depth Marathi Udyoga Bhashya connecting the verses to daily enterprise, workplace ethics, and inner peace.

3. Technology Choices and Solution Options Explained

To provide clear choices in capabilities and budget, we offer two distinct solution options based on leading commercial artificial intelligence engines:

OPTION 1: Hybrid Solution (ChatGPT for Two Books + Google Gemini for Master Coordinator)

How the Models Are Assigned:

- **Narada Specialist:** OpenAI ChatGPT (GPT-4o)
- **Shandilya Specialist:** OpenAI ChatGPT (GPT-4o)
- **Sutrakar Master Coordinator:** Google Gemini (Gemini 1.5 Pro)

Why This Setup Works:

ChatGPT handles the active question-and-answer dialogue between the two books with speed and clarity. The **Sutrakar Master Coordinator is powered by Google Gemini** because Google Gemini has an enormous memory (up to 2,000,000 words at once). This allows the master coordinator to keep the entire book in mind continuously, ensuring that no explanation is ever repeated and that all Vedic references are carefully checked.

Commercial Investment (Option 1):

- AI Cloud Compute & Model Infrastructure (50 full cycles): **Rs. 18,000 INR**
- Hiranyam AI Development and Service Fee: **Rs. 27,678 INR**
- **Total Proposed Investment (Option 1): Rs. 45,678 INR**

OPTION 2: Dedicated Google Gemini Vedic Specialist Solution (Recommended)

How the Models Are Assigned:
• **Narada Specialist:** Google Gemini (Gemini 1.5 Pro Specialized)
• **Shandilya Specialist:** Google Gemini (Gemini 1.5 Pro Specialized)
• **Sutrakar Master Coordinator:** Google Gemini (Gemini 1.5 Pro Advanced High-Reasoning)

Why This Option Is Superior for Ancient Scriptures:
Option 2 gives all three specialists deep Vedic and Sanskrit expertise:
1. **Vast Knowledge of Indian Scriptures:** Google has digitized millions of ancient Indian books, Sanskrit commentaries, and Marathi historical texts through its global library archives.
2. **Composes Brand-New Sanskrit Shlokas:** When an authentic match is approved, Gemini possesses the unique ability to **write brand-new, poetically metered Sanskrit verses (new Udyoga Sutras)** for the client's new book.
3. **Authentic Classical Marathi:** Writes dignified, classical Marathi commentary (Bhavartha) naturally, without unnatural English-sounding phrasing.
4. **Unified Memory Across 50 Full Cycles:** All three specialists share the exact same brain architecture, allowing completely seamless coordination across 50 full cycles of re-running and fine-tuning.

Commercial Investment (Option 2):
• AI Cloud Compute, Deep Caching, High-Reasoning & Infrastructure: **Rs. 45,000 INR**
• Hiranyam AI Development and Service Fee: **Rs. 33,910 INR**
• **Total Proposed Investment (Option 2): Rs. 78,910 INR**

4. Scope of Services Covered under Hiranyam AI Development and Service Fees

Our development and service fees cover the complete technical software engineering, database setup, and digital draft delivery up to the stage of the client's proofreading. The specific fee applies according to the option chosen:

Under Option 1 (Hybrid Solution):	**Hiranyam AI Development and Service Fee is Rs. 27,678 INR**
Under Option 2 (Gemini Specialized):	**Hiranyam AI Development and Service Fee is Rs. 33,910 INR**

What Is Covered Under Our Service Fee:

- **Multi-Agent Software Engineering:** Building and fine-tuning the automated coordination system connecting the Narada, Shandilya, and Sutrakar specialists.
- **Scriptural Database Setup (ChromaDB):** Indexing all 100 Shandilya verses and 84 Narada verses for instant mathematical comparison and retrieval.
- **Senior Citizen (65+ Mode) Web Review Portal:** Setting up an easy-to-use digital reading portal for Shri Shripad Kulkarni with extra-large fonts, high contrast, and simple buttons.

- **Pre-Proofreading Book PDF Deliveries:** Generating clean, beautifully typeset digital PDF drafts containing Sanskrit verses and Marathi commentary for the client's internal proofreading.
- **Up to 50 Full Cycles of Re-running & Author Corrections:** Executing all adjustments, re-evaluations, and re-arbitration runs per author feedback until the final text is approved.
- **Delivery of Final Digital Master PDF:** Providing the finalized digital PDF manuscript ready for the client's publication and printing team.

Note on Client Responsibilities: Actual proofreading, physical printing, bookbinding, and formal book publishing will be handled independently by the client. Hiranyam AI Labs delivers all digital manuscript materials ready up to the proofreading stage.

5. Milestone Schedule & Delivery Roadmap

Milestone	Deliverable Description	Target Timeline	Payment Due
Milestone 1: Project Kickoff & Setup	Database indexing of 184 sutras, setup of three specialists, and launch of Senior Citizen portal.	Week 1	**40%** of Service Fee + AI Infra Deposit
Milestone 2: Delivery of Pre-Proofreading Draft PDF	Complete batch execution of all 84 Narada verses against 100 Shandilya verses. Delivery of first complete pre-proofreading book PDF for client review.	Week 2	**30%** of Service Fee
Milestone 3: Client Proofreading & Revisions	Author reviews verses in portal and conducts proofreading. Multi-agent revisions and re-runs executed per author guidance.	Weeks 3 – 4	—
Milestone 4: Final Approval & Master PDF Handover	Final approval by Shri Shripad Kulkarni. Delivery of finalized master PDF manuscript ready for client's publishing team.	Week 5	**30%** Final Balance

6. Commercial Quotation Summary

Cost Element	Option 1: Hybrid Solution (ChatGPT + Gemini Sutrakar)	Option 2: Gemini Specialized (All Agents on Google Gemini)
Autonomous AI Cloud Compute & Infrastructure (50 full canon passes, multi-million token volume, database hosting)	Rs. 18,000 INR	Rs. 45,000 INR
Hiranyam AI Development and Service Fee (Software engineering, portal, pre-proofreading PDFs, up to 50 revisions)	**Rs. 27,678 INR**	**Rs. 33,910 INR**
Original Sanskrit Shloka Formulation	Standard Synthesis	**Included (Original Sanskrit Shlokas)**
Pre-Proofreading PDF Deliveries & 50 Rework Cycles	Included till Final Master Delivery	Included till Final Master Delivery
TOTAL PROPOSED INVESTMENT	**Rs. 45,678 INR**	**Rs. 78,910 INR**

**Note: Proofreading, physical printing, bookbinding, and formal publishing will be arranged independently by the client. Hiranyam AI Labs delivers the finalized master digital PDF ready for printing upon completion of revisions.*

7. Proposal Acceptance & Project Authorization

By signing below, the client confirms the selection of either Option 1 or Option 2 and authorizes Hiranyam AI Labs to commence work according to the milestone schedule outlined herein.

Accepted Option (Please Circle):	**[ ] Option 1 (Rs. 45,678 INR)** **[ ] Option 2 (Rs. 78,910 INR)**
